

State of the Mobile Web, April 2010

May 28, 2010

Last month, Opera Mini added a new handset to its list of officially-supported devices: the iPhone. Certainly this achievement has been well-covered by the media. With more than one million downloads in the first day alone, we are deeply proud that iPhone users are interested in experiencing Opera Mini on their device of choice.

As much of a milestone as it is, the iPhone is only one out of more than 800 handsets supported by Opera Mini. Although we laud these individual phones for the amazing things they can do, we must remember that one handset is but a drop of rain in the ocean that is the mobile phone industry.

We should apply the same logic to the mobile Web. While some iconic devices are superb web-browsing tools, today it is possible to make nearly every phone capable of browsing the Web gracefully.

Nearly 60% of the world has access to a mobile phone. Mobile-web users will eventually dwarf the wireline users. To make a Web that works flawlessly on only a handful of mobile devices is to turn our collective backs on more than a billion new users.

Despite the warning, I look forward to the future. There are too many smart minds and capable teams working to ensure the Web remains one everyone can access. We believe access to the Web is a universal right. I am confident we are closer to that goal than ever before.

Thanks for reading,

Jon S. von Tetzchner
Co-founder, Opera Software

Highlights

- As shown in Part 1 of the report, Opera Mini saw significant increases in all three categories of growth in April 2010: unique users, pages viewed and data consumed. In all, 58.9 million people used Opera Mini in April, 26.3 billion pages were served, and 3.7 petabytes of operator data were compressed for Opera Mini users.
- As seen in Part 2 of the report, the United States jumped ahead of both Nigeria and South Africa in terms of total Opera Mini users in the month of April. See Part 4 for more information.
- In Part 3 of this month's report, we look at countries in the Commonwealth of Independent States (CIS). The top 11 countries using Opera Mini in that region are Russia, Ukraine, Belarus, Kazakhstan, Armenia, Uzbekistan, Kyrgyzstan, Moldova, Azerbaijan, Tajikistan and Turkmenistan.
- Some numbers: From April 2009 to April 2010, page views in the top 11 countries of the CIS increased by 84%, unique users increased by 63% and data transferred increased by 97%.
- Growth rates in the CIS: Turkmenistan and Kyrgyzstan lead the top 11 countries of the region in terms of page-view growth (508,484.1% and 663.9%, respectively). Turkmenistan and Kyrgyzstan also lead the top 11 countries of the region in growth of unique users (194,769.2% and 551.2%, respectively). Armenia leads the top 11 countries of the region in page views per user, with each user browsing 1085 pages on average each month.
- In the CIS, the big winners (as usual) are V Kontakte, Mail.Ru, odnoklassniki.ru, Yandex and Google.
- Opera Mini users in the CIS generally prefer Nokia handsets, followed by Sony Ericsson and Samsung.
- In Part 4 of this month's report, we take a closer look at the impact of Opera Mini becoming available on the Apple iPhone.
- In April 2010, there were over 2.6 million unique users of Opera Mini on the iPhone.
- As predicted in last month's report, the Apple iPhone is the #3 device used by Opera Mini users worldwide in the month of April 2010.
- Most likely due to the interest generated by Opera Mini's new availability on the iPhone, the United States jumped from #8 to #6 in the top 10 countries list.
- The United States is ranked #1 in terms of Opera Mini users on the iPhone, and the iPhone is the #1 handset used by Opera Mini users in the United States, well ahead of BlackBerry (which previously occupied the top spot).
- The United Kingdom is ranked #4 in terms of Opera Mini users on the iPhone, and the iPhone is the 5th most popular handset used by Opera Mini users in the United Kingdom.
- Russia is ranked #7 in terms of Opera Mini users on the iPhone, but the iPhone is not one of the top 10 handsets in Russia according to Opera Mini usage.
- Countries outside of the top 10 where Opera Mini on the iPhone has become popular include: Japan, Germany, France, Canada, Netherlands, Italy and South Korea.

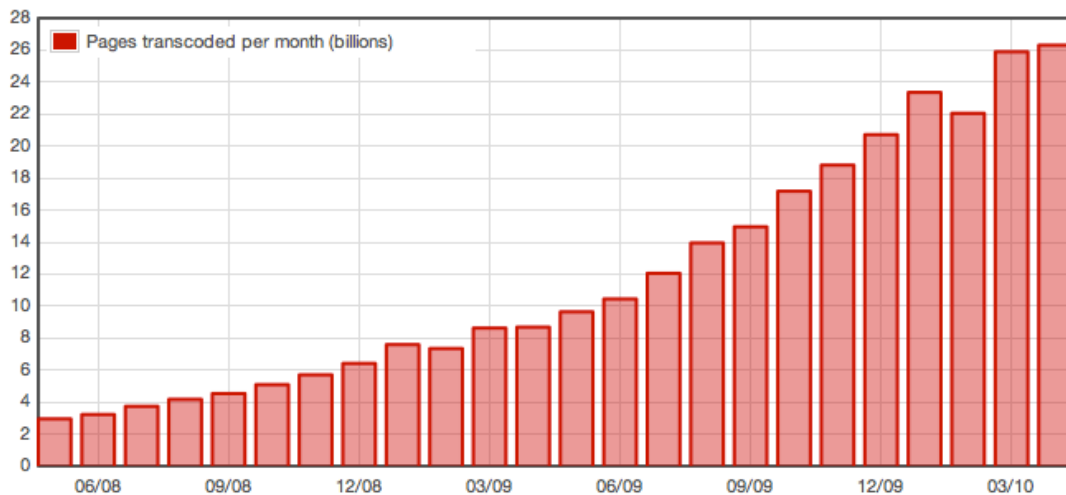

Part 1: Growth

Number of users

In April 2010, Opera Mini had over 58.9 million users, a 6.6% increase from March 2010 and more than 152% compared to April 2009.

Pages transcoded

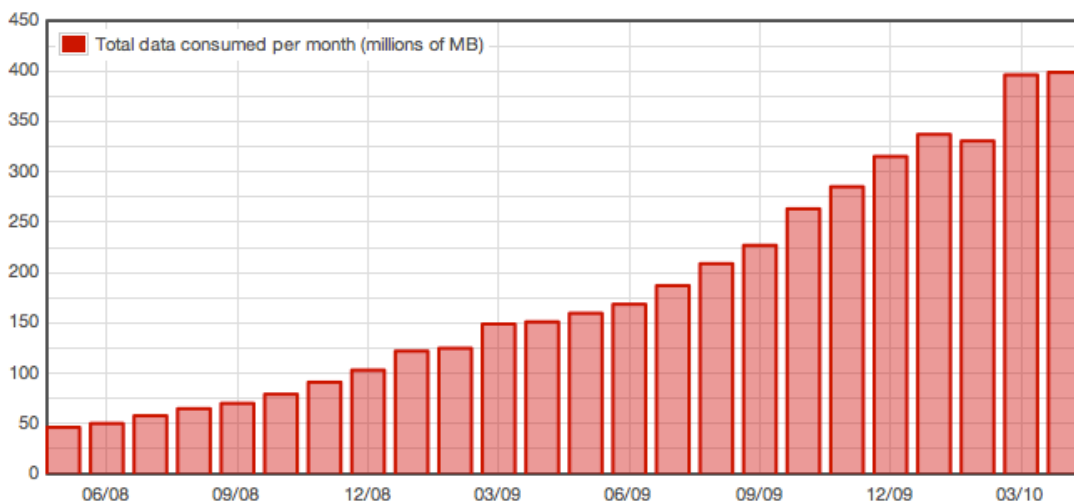

Opera Mini users viewed over 26.3 billion pages in April 2010. Since March, page views have gone up 1.6%. Since April 2009, page views have increased 203%.

Pages transcoded per month (billions)

Data consumed

In April 2010, Opera Mini users generated over 398 million MB of data for operators worldwide. Since March, the data consumed went up by 0.6%. Data in Opera Mini is compressed up to 90%. If this data were uncompressed, Opera Mini users would have viewed over 3.7 petabytes of data in April. Since April 2009, data traffic is up 164%.

Total data consumed per month (millions of megabytes)

Part 2: Country snapshots for April 2010

Snapshot: Russia

- Page-view growth since April 2009: 67.8%
- Unique-user growth since April 2009: 51.8%

Part 3: Spotlight on the Commonwealth of Independent States

Highlights

- The top 11 countries using Opera Mini in the region are Russia, Ukraine, Belarus, Kazakhstan, Armenia, Uzbekistan, Kyrgyzstan, Moldova, Azerbaijan, Tajikistan and Turkmenistan.
- Some numbers: From April 2009 to April 2010, page views in the top 11 countries of the CIS increased by 84%, unique users increased by 63% and data transferred increased by 97%.
- Growth rates in the CIS: Turkmenistan and Kyrgyzstan lead the top 11 countries of the region in terms of page-view growth (508,484.1% and 663.9%, respectively). Turkmenistan and Kyrgyzstan also lead the top 11 countries of the region in growth of unique users (194,769.2% and 551.2%, respectively). Armenia leads the top 11 countries of the region in page views per user, with each user browsing 1085 pages on average each month.
- In the CIS, the big winners (as usual) are V Kontakte, Mail.Ru, odnoklassniki.ru, Yandex and Google.
- Opera Mini users in the CIS generally prefer Nokia handsets, followed by Sony Ericsson and Samsung.

Part 4: iPhone impact

In April 2010, Opera Mini became officially available on the Apple iPhone. We predicted this would mean a big month for Opera Mini around the world, and that is what we observed.

Highlights

- In April 2010, there were over 2.6 million unique users of Opera Mini on the iPhone.
- As predicted in last month's report, the Apple iPhone is the #3 device used by Opera Mini users worldwide in the month of April 2010.
- Most likely due to the interest generated by Opera Mini's new availability on the iPhone, the United States jumped from #8 to #6 in the top 10 countries list.
- The United States is ranked #1 in terms of Opera Mini users on the iPhone, and the iPhone is the #1 handset used by Opera Mini users in the United States, well ahead of BlackBerry (which previously occupied the top spot).
- The United Kingdom is ranked #4 in terms of Opera Mini users on the iPhone, and the iPhone is the 5th most popular handset used by Opera Mini users in the United Kingdom.
- Russia is ranked #7 in terms of Opera Mini users on the iPhone, but the iPhone is not one of the top 10 handsets in Russia according to Opera Mini usage.
- Countries outside of the top 10 where Opera Mini on the iPhone has become popular include: Japan, Germany, France, Canada, Netherlands, Italy and South Korea.

Top 10 devices according to Opera Mini usage (global)

1. Nokia 5130 XpressMusic
2. Nokia 6300
3. Apple iPhone
4. Nokia 2700c
5. Nokia N70
6. Nokia 3110c
7. Nokia 5310 XpressMusic
8. Nokia 2330c
9. Nokia N73
10. Nokia 5800d

Here are the top 10 countries (according to several metrics) where people are using Opera Mini on the Apple iPhone.

Unique users	Pages viewed	Data transferred	Pages viewed per user
